E-Mobility | Halle 8

From Cycling to Mobility: Dies beschreibt die Entwicklung des Fahrrads von einem reinen Freizeit- und Sportgerät hin zu einem Verkehrsmittel der Mobilitätswende. Neben dem klassischen Fahrrad präsentieren sich Fahrzeuge und dazugehörige Produkte von klein, wie E-Scooter, bis groß, wie Cargobikes und LEVs. Ohne digitale Dienste und Services, die Schnittstellen ermöglichen, und ohne passende Infrastruktur, ist ein sinnvoller Gebrauch eines Fahrrades (fast) nicht mehr denkbar. All diese Themen werden in Halle 8 unter dem Begriff der „Future Mobility" aufgegriffen.

From Cycling to Mobility: this describes the development of the bicycle from a device purely intended for leisure and sport to a means of transport suitable for the green mobility transformation. In addition to the classic bicycle, the vehicles and accompanying products on show range from the small, such as stand-up e-scooters, to the large, such as cargo bikes and LEVs. Without digital aids and services that provide an interface, and without suitable infrastructure, it is now (almost) impossible to imagine using bicycles. All of these topics will be addressed in Hall 8 under the heading of Future Mobility.
